Dear User,

We have work hard to provide a product that is user friendly and do not require drivers. If you are reading this document, this product that you have purchase does not require any drivers from us. It is design to be Plug & Play.

This bracket with its USB cable is just an extension from your motherboard USB 3.0 header or from an add-on card with the USB 3.0 20 pin header. There are no need for any drivers, it is already built into the Operating Systems you are using and when you connect this device, it will automatically install the drivers within the OS for you.

Thank you for looking into our product.
Vantec Technical Support Team.
